

Haranya Yogananthan

Profile

A dedicated and passionate Architecture Part 1 Graduate from the University of Reading. My educational journey and the diverse experiences have equipped me with a firm foundation in architectural design and contributed positively to my understanding of the aesthetic and functional aspects of design. I approach my work with unwavering commitment and attentiveness and thrive in collaborative team environments.

Experience

Project Manager and Draftsman, Peter Pendleton and Associates Ltd; London Projects, United Kingdom - August 2023 - Present

As a Draftsman and Project Manager at a town planning firm, I worked on various architectural and interior design projects, including a pub, hotel, restaurant, and apartment building. My responsibilities included drafting and revising plans to meet client needs, ensuring that designs were both aesthetically pleasing and compliant with regulations. I also designed plans for converting an abandoned building into a hotel, focusing on optimizing space usage and ensuring compliance with safety standards. In managing a double-story side and rear extension for a residential property, I oversaw the entire process from planning application to contractor oversight, updating existing plans to reflect the client's vision. This role involved extensive communication with clients, architects, and contractors, allowing me to promptly address issues and keep the project on track.

Internship & Part Time Job, Optima Planning Engineering Ltd.; London, UK August 2022 to April 2023 (9 months)

Focused on a client's extension project, conducting consultations and preparing surveys for planning applications. This role enhanced my understanding of large-scale project management and client collaboration. Worked on house extensions and larger initiatives, developing design along with the clients. The remote nature of the job required strong communication and time management skills, adopting creative techniques to balance work and school commitments.

Summer Internship, KW Associates and Architecture Sdn. Bhd.; Malaysia - 2020 (July)

Multiple AutoCAD floorplans were converted into SketchUp models, involving the adjustment of existing designs to meet the preferences of new clients. Proficiency was also gained in adeptly communicating with colleagues within the constraints of a COVID-19 environment.

Summer Internship, Farrow Silverton Architects; London, United Kingdom - 2019 (August)

During the training, I acquired skills in SketchUp and AutoCAD, which I later applied to develop a digital model of a modern residence. Additionally, I conducted client site visits, where I interacted with clients and subcontractors, helping to enhance my communication skills, which are integral to the architect's role.

Work Placement, Eco Chic; London, United Kingdom - 2017 (July)

Led the virtual growth strategy of Eco Chic which involved developing and creating a new website. This included inputting, illustrating, describing and detailing product inventory and creating an inventory product system. I also contributed articles highlighting the company's commitment to environmental consciousness.

Education

University of Reading — BSc Architecture - 2023

Courses

University of Westminster, Access to Architecture Summer Course — 2017

Completed a collaborative course on tension structures, small-scale models, and large-scale project design.

SheCodes, Introduction to Coding — 2022

Completed an introductory coding course and currently participating in a front-end developer course, showcasing my commitment to continuous learning and diversifying my skill set including HTML, CSS and JavaScript.

Contact
